

**Premium Aluminium and uPVC
*Door & Window Solutions***

Where **Smart** Design Meets *Seamless Comfort.*

Our Mission

Our mission at APERTURAA Aluminium is to design, manufacture and install world-class window and door systems that elevate lifestyle and deliver long-lasting comfort. We aim to combine precision engineering, global-quality hardware and climate-ready technology to create solutions that withstand India's extreme weather conditions and high-rise wind loads. By empowering homeowners, architects and builders with custom, durable and energy-efficient products, we ensure every installation reflects trust, craftsmanship and seamless performance.

Our Vision

APERTURAA Aluminium envisions becoming India's most trusted name in high-performance uPVC and aluminium windows and doors—solutions that bring safety, comfort and elegance to every home. We strive to shape modern Indian skylines with systems engineered for high-rise living, built to withstand heat, monsoon, pollution and changing climate, while helping families experience quieter, cleaner and smarter living every day.

Our Values

APERTURAA Aluminium envisions becoming India's most trusted name in high-performance uPVC and aluminium windows and doors—solutions that bring safety, comfort and elegance to every home. We strive to shape modern Indian skylines with systems engineered for high-rise living, built to withstand heat, monsoon, pollution and changing climate, while helping families experience quieter, cleaner and smarter living every day.

Why APERTURAA

APERTURAA Aluminium was created with a simple goal— to make homes more comfortable, secure, and beautifully designed for Indian living conditions. Our window and door systems are thoughtfully engineered to handle extreme heat, dust, heavy monsoons, and daily wear. From energy-efficient uPVC systems to high-strength aluminium frames with slim, modern profiles, every product is built with precision to deliver long-term stability, smooth performance, and reliable protection year after year.

What truly strengthens our systems is our glass expertise. Through **NewTrack** Toughened Glass, established in 2016, we bring years of hands-on experience in manufacturing high-quality toughened and architectural glass. This allows us to perfectly integrate glass with our uPVC and aluminium systems, offering better insulation, enhanced safety, reduced noise, and improved indoor comfort. With options like double and triple glazing, EPDM gaskets, and multi-point locking, our solutions help create quieter, cleaner, and more energy-efficient living spaces.

At APERTURAA, we believe quality goes beyond materials—it reflects in how we work with our customers. From precise site measurements and skilled fabrication to clean installation and dependable after-sales support, we ensure every system performs exactly as promised. With transparent communication, branded hardware, and a strong focus on durability and trust, APERTURAA becomes more than a manufacturer—we become a long-term partner in building homes that look beautiful and live beautifully.

Great **Living** Begins with Better *Windows & Doors.*

Casement Doors & Windows

Engineered to Open Wide, Perform Strong.

APERTURAA Casement Doors and Windows are engineered to deliver seamless functionality with wide-arc inward or outward opening, reinforced structural strength, and an advanced multi-point locking system for superior security. The dual-gasket climate shield ensures exceptional protection against dust, noise, heat, and rain, while the system's robust profiles support large sash sizes for brighter, more open interiors. Optional performance thresholds boost insulation, and every unit is crafted with precision to offer long-lasting durability, smooth operation, and timeless aesthetic appeal—perfectly suited for the diverse demands of Indian homes and high-rise environments.

- Wide-Arc Inward/Outward Opening
- Advanced Multi-Point Security System
- Dual-Gasket Climate Shield
- Reinforced Structural Profile Strength
- Enhanced Acoustic & Thermal Comfort
- Large-Sash Compatibility Design
- Optional Performance Threshold
- Precision-Built Long-Life Mechanism

Sliding Doors & Windows

Slide into clarity, comfort, and seamless living with Aperturaa.

Aperturaa's Sliding Door and Window System is designed to create expansive, airy, and modern living spaces with effortless glide performance, reinforced durability, and optional fly mesh integration for all-season comfort. With wide opening capacity, slim sightlines for uninterrupted views, and superior sealing for dust, noise, and thermal control, the system enhances both functionality and aesthetics while ensuring smooth operation and long-lasting structural stability for contemporary interiors and balcony.

- Engineered for large seamless openings
- 66% clear ventilation and daylight
- Ideal for halls and balconies
- Multiple 3-track shutter options
- Reinforced for heavy wind loads
- Minimal leakage, dust and noise
- Slim interlock for wider views
- Elegant finish with lasting shine
- Optional fly mesh integration available

Aluminium

Slim Casement Door

Slim Look, Solid Performance.

The APERTURAA Slim Aluminium Casement Door System blends minimalist aesthetics with strong structural performance. Ultra-slim sightlines and concealed hardware create wider views and seamless operation. Designed for high sealing efficiency and low-maintenance durability, it perfectly complements modern premium spaces.

- Ultra-Slim Modern Profile with Narrow Sightlines
- Open-In & Open-Out Functional Flexibility
- Concealed Precision Hardware for Minimal Aesthetics
- Low-Maintenance, High-Performance Aluminium System
- Contemporary Finish Options for Premium Design Continuity
- 35 mm Slim Frame Depth Construction
- Height Capacity up to 3000 mm
Width Capacity up to 1200 mm
- Supports up to 60 kg per Sash with Stable Reinforcement
- Glazing Compatibility: 6–10 mm Internal Single Glass
- Smooth, Secure & Seamless Operation

Aluminium

Slim Casement Window

Casement Clarity, Crafted for Comfort.

APERTURAA Casement Windows offer smooth inward or outward opening with a clean, modern silhouette built for everyday durability. Slim profiles, concealed hardware and advanced sealing ensure more light, less noise and superior weather protection. Designed for long-term performance, they deliver elegant function and reliable comfort for contemporary living.

- Flexible opening action: inward or outward functionality
- Sleek, contemporary form with discreet hinge detailing
- Low-upkeep aluminium system engineered for endurance
- Multiple frame styles and finish palettes to suit any façade
- Frame Depth: 45 mm engineered aluminium structure
- Height Compatibility: up to 3000 mm
- Width Compatibility: up to 1200 mm
- Sash Dimensions: up to 3000 mm height / 1000 mm width
- Load Handling: 120 kg per sash stability performance
- Glazing Range: 6–32 mm single, double or triple insulated glass options

Aluminium

Slim Telescopic Sliding Door

Slide More. See More. Live Wide.

The APERTURAA Telescopic Sliding Door System is crafted for grand openings with multiple sliding panels moving in sync for maximum clear span. Its sleek aluminium tracks, smooth rollers and precision hardware offer silent glide, effortless movement and uninterrupted panoramic views. Built for premium spaces, it delivers durability, daylight, and design elegance in one seamless motion.

- Multi-panel telescopic sliding configuration for expansive openings
- Ultra-smooth synchronized glide with high-grade rollers and track system
- Low-maintenance, weather-resistant aluminium structure
- Wide finish palette and profile options suited to luxury façades
- Frame Depth: 35 mm precision aluminium assembly
- Max Overall Frame Width: up to 5000 mm clear span
- Max Frame & Panel Height: up to 3000 mm for grand openings
- Panel Width Capacity: up to 1000 mm per sash
- Weight Handling: supports up to 100 kg per moving sash
- Glazing Compatibility: 6–10 mm single glazing configuration

Aluminium

Slim Syncro Sliding Door

One Motion. Many Panels. Perfect Harmony.

APERTURAA Synchronized Sliding Doors move multiple panels together in a single effortless glide, creating wider openings with seamless flow. Precision hardware and smooth track engineering ensure silent, coordinated movement without disruption. Designed for modern luxury spaces, they deliver uninterrupted views, refined aesthetics, and unmatched ease of use.

- Multi-panel telescopic sliding configuration for expansive openings
- Ultra-smooth synchronized glide with high-grade rollers and track system
- Low-maintenance, weather-resistant aluminium structure
- Wide finish palette and profile options suited to luxury façades
- Frame Depth: 35 mm precision aluminium assembly
- Max Overall Frame Width: up to 5000 mm clear span
- Max Frame & Panel Height: up to 3000 mm for grand openings
- Panel Width Capacity: up to 1000 mm per sash
- Weight Handling: supports up to 100 kg per moving sash
- Glazing Compatibility: 6–10 mm single glazing configuration

Aluminium

Fold & Slide Door

Open the Wall. Expand the Living.

APERTURAA Fold & Slide Doors are designed to open up wide spaces, seamlessly connecting indoor and outdoor living. Their smart folding panels glide smoothly and stack neatly to the side, freeing up large wall openings without blocking usable space. Built with reinforced profiles and precision hardware, they ensure smooth operation, strong security, and lasting performance.

- Outer Frame Depth: 45 mm robust aluminium construction
- Maximum Frame Height: up to 3000 mm
- Maximum Frame Width: up to 5800 mm
- Maximum Sash Height: up to 3000 mm
- Maximum Sash Width: up to 1000 mm
- Load Capacity: up to 120 kg per sash
- Glazing Compatibility: 6–32 mm
- single, double & triple glazing options

Aluminium

Slim Sliding Door

Slim Lines. Smooth Living.

APERTURAA Slim Sliding Doors combine sleek design with reliable performance for modern living spaces. Their slim profiles invite maximum daylight while ensuring smooth, effortless sliding even with heavier panels. Designed for two to four panel configurations, they deliver stability, weather protection, and lasting elegance.

- Space-efficient inline sliding design with zero swing intrusion
- Contemporary engineering with sleek, modern aesthetics
- Advanced multi-point locking for enhanced safety and reliability
- Precision rollers for smooth, effortless sliding action
- Wide opening configurations for better airflow and daylight
- Option for three glazed panels offering up to ~66% clear opening
- Option for two glazed panels with ~50% opening plus integrated mesh panel
- Frame Depth Options: 90 mm & 140 mm
- Maximum Frame Size: up to 3000 mm (height × width)
- Maximum Sash Dimensions: up to 3000 mm height × 1500 mm width
- Load Handling Capacity: up to 180 kg per sash
- Glazing Compatibility: 6–22 mm

Aluminium

Slim Sliding Window

Slim Strength, Silent Comfort.

APERTURAA Slim defines luxury aluminium windows with an ultra-sleek, refined appearance and precision engineering. Designed with advanced sealing and rain protection, it helps block noise, dust, heat, and pollution for a calmer indoor environment. Built with a high-strength stainless steel track system, it delivers lasting durability while pairing seamlessly with premium slim window collections.

- Track Configuration: 2-track and 3-track system options
- Frame Width: 85 mm (2-track) | 126 mm (3-track)
- Bottom Track Height: 40 mm
- Interlock Profile: Slim 20 mm design
- Wind Load Resistance: Up to 1.5 kPa
- Maximum Height Capability: Up to 2700 mm
- Maximum Sash Area: 4.5 sq. m per panel
- Acoustic Performance: Noise reduction up to 35 dB
- Glass Compatibility: Toughened, laminated, and double-glazed unit options

Aluminium

Casement Window with Grill

Fresh air, with safety built in.

Aperturaa Aluminium Casement Windows with integrated safety grills combine openable comfort with enhanced security. Designed for smooth inward or outward operation, they allow maximum ventilation while maintaining protection and peace of mind. Built with high-grade aluminium and precision-fitted grills, these windows deliver durability, safety, and modern aesthetics.

- Smooth casement operation for maximum airflow and visibility
- Integrated safety grill for added protection without compromising design
- Strong, corrosion-resistant aluminium frames for long-lasting performance
- Secure locking system for everyday safety and convenience
- Easy to clean, low-maintenance design ideal for modern homes

Aluminium Patio Door Sliding

Two ways to open. One smart solution.

Aperturaa Aluminium PT (Push-Turn) Doors are a smart, space-efficient solution designed for modern interiors that demand flexibility and elegance. Combining smooth sliding panels with a push-turn swing panel that opens up to 180°, this innovative system allows wide access without occupying valuable floor space. Crafted from high-grade, corrosion-resistant aluminium, PT doors are fully customisable to suit residential and commercial environments alike. Ideal for apartments, bedrooms, kitchens, bathrooms, offices, hotels, and cafés, these doors offer multiple access and ventilation options while delivering a sleek, contemporary aesthetic with reliable performance.

- Dual-function system with smooth sliding and swing operation
- Space-saving design that maximizes clear opening and access
- Trackless bottom for enhanced safety and seamless movement
- Low-maintenance system that is easy to clean and maintain
- Sleek aluminium frames paired with modern glass panels
- Flexible multi-panel configurations to suit different openings
- Effortless, hassle-free operation for everyday use
- Ideal for both residential and commercial applications

Aluminium

Slim Office Partition

Define Spaces. Keep Them Light.

APERTURAA Slim Partitions create elegant separations without blocking light or openness. Their sleek profiles and refined finishes blend seamlessly into modern interiors. Designed for stability and acoustic comfort, they balance privacy with a spacious feel.

- Slim aluminium framing for minimal visual obstruction
- High structural stability for large partition spans
- Precision-engineered joints for clean alignment
- Compatible with laminated and acoustic glass options
- Designed to enhance sound control between spaces
- Smooth surface finish for easy maintenance
- Suitable for commercial and premium residential interiors
- Engineered for long-term durability and consistent performance

Aluminium Shower Cubicle

Clear Design. Pure Comfort.

APERTURAA Shower Cubicles bring a clean, contemporary look to modern bathrooms with slim profiles and clear glass. Engineered with precision sealing and corrosion-resistant hardware, they ensure a dry, durable, and hassle-free shower experience. Designed for everyday comfort, they combine smooth operation with easy maintenance and lasting performance.

- Slim aluminium framework for a modern, minimal look
- Toughened safety glass compatibility for wet-area use
- Precision sealing system to prevent water leakage
- Corrosion-resistant hardware for long-lasting performance
- Smooth opening and closing mechanism for daily comfort
- Designed for easy cleaning and low maintenance
- Stable structure with accurate corner alignment
- Suitable for residential and hospitality bathroom spaces

Slim Railing

Safety Framed in Style.

APERTURAA Aluminium Railings combine strength, safety, and refined design for modern architectural spaces. Engineered with durable aluminium profiles and precise finishing, they offer long-lasting performance with minimal maintenance. Ideal for balconies, staircases, and terraces, they enhance openness while delivering dependable protection.

- High-strength aluminium profiles for structural safety
- Engineered for residential and commercial load requirements
- Corrosion- and weather-resistant surface treatment
- Compatible with glass, vertical, or horizontal infill options
- Precision-fabricated joints for secure installation
- Smooth, uniform finish for long-term durability
- Low-maintenance system suitable for outdoor applications
- Designed to meet modern architectural and safety standards

Aluminium

Slim Wardrobe Profile

Slim profiles. Strong statements.

Aperturaa Slim Aluminium Wardrobe Profiles are designed for modern living spaces where aesthetics and performance go hand in hand. With ultra-slim sightlines and high-strength aluminium construction, the system delivers a refined, contemporary look without compromising durability. Precision-engineered for smooth operation and long-term reliability, these profiles integrate effortlessly into luxury bedrooms, walk-in closets, and modular interiors, creating a clean and timeless wardrobe experience.

- Ultra-slim aluminium profiles for a sleek, modern finish
- High structural strength with lightweight performance
- Smooth sliding compatibility with premium hardware
- Corrosion-resistant, low-maintenance aluminium design
- Perfect for luxury wardrobes and modular interiors

Aluminium

Arch Door

Elegance, shaped in a curve.

Aperturaa Aluminium Arch Doors feature gracefully curved frames that add timeless elegance to luxury interiors and façades. Built with corrosion-resistant aluminium and high-strength curved tempered glass, these doors offer durability, safety, and visual refinement. Advanced sealing systems ensure smooth operation, weather protection, and long-lasting performance.

- Complements a wide range of styles, from modern minimal interiors to classic and luxury architecture
- Premium powder-coated aluminium finish ensures long-lasting colour, texture, and visual appeal
- Excellent thermal and sound insulation for enhanced indoor comfort
- High-durability aluminium construction with minimal maintenance over time
- Smooth glass surfaces allow quick, easy cleaning with minimal effort

Aluminium

Full Panel Door

Solid aluminium. Silent strength.

Aperturaa Full Aluminium Doors are engineered with a robust all-aluminium structure and high-density honeycomb core for superior strength and stability. Designed to resist humidity, temperature changes, and daily wear, these doors deliver long-lasting performance with a refined, modern finish. Precision sealing and solid construction ensure quiet operation, safety, and a premium architectural presence.

- Full aluminium construction for maximum durability and structural strength
- High-density aluminium honeycomb core for sound reduction and stability
- Moisture- and temperature-resistant design for long-term performance
- Precision-engineered frame and panel for seamless alignment
- Low-maintenance, modern finish ideal for residential and commercial use
